eCommerce & Mobile Expertise

## eCommerce & Mobile Expertise

Information Integration Group, Inc. (IIG) is a leading provider of enhancements to automate business operations for small to mid size companies since 1991.

Integrate Sage 100 with your website, or develop programs to address a specific business process requiring a task to be performed on web or any mobile device.

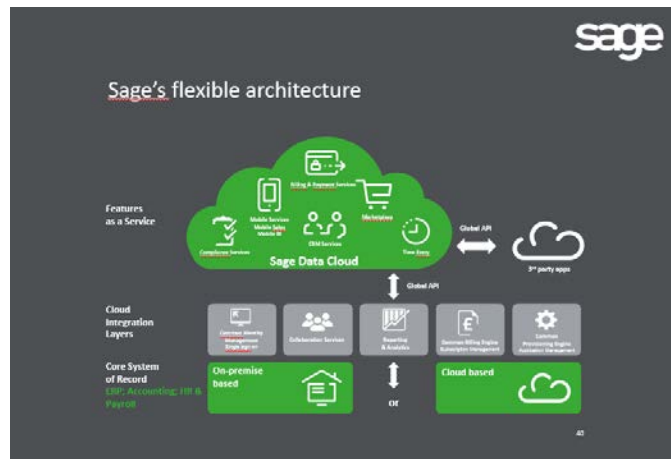

### IIG has made it feasible to develop web and mobile solutions by:

- Developing routines to address information received from source systems:
  - Sales Tax – use of AvaTax as part of the integration or mapping taxing authority settings to Sage100's tax calculation routines
  - Credit Card Processing – mapping credit card information to Sage Payment Solutions or IIG's Credit Card Processing. Transactions are loaded in Sage100 either as:
    - Paid
    - Pre-Authorized
    - Tokenized credit card numbers to be charge by Sage100
  - Freight Processing
    - Returning freight amount from Sage100 to the product
    - Rate shopping in Sage100 for the order
    - Returning tracking id to the 3<sup>rd</sup> party product
- Build a staff with expertise in
  - Sage Sdata Adapter, Sage Cloud Services
  - Sage WebServices
  - PHP / Json-query / Java / C++

IIG is often able to develop web and mobile solutions with similar efforts as developing routines in the Sage100 code set. These expertise are gained over the years by IIG's development team as integrations are developed for many of leading products for eCommerce, Credit Card Processing, Shipping and other ERP systems.
